

BAD DESIGN

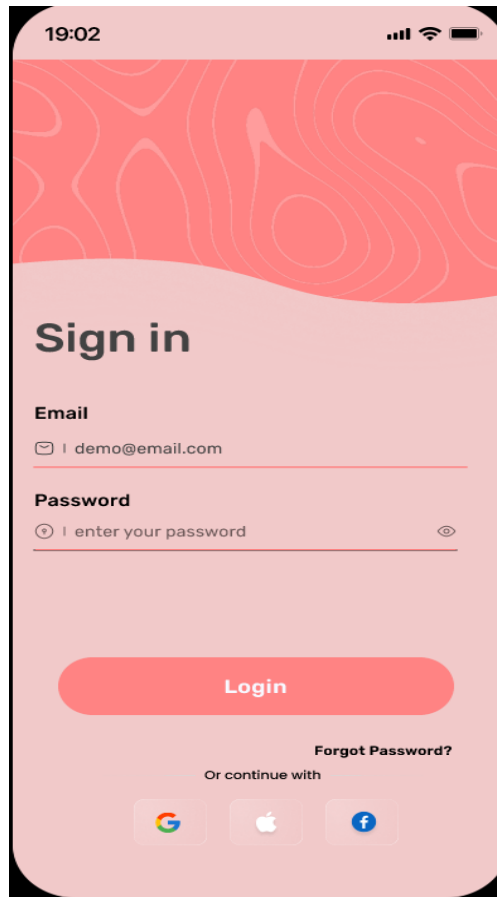

Contrast Issues: The placeholder text and icons inside input fields are **too light** against the dark background. This can make readability harder for users with low vision.

Small Touch Targets: The social login buttons appear a bit small, making them harder to tap on mobile devices.

Password Visibility Icon: The visibility toggle icon is **small** and might be hard to tap. It should be slightly larger for better usability.

No "Sign Up" Option: If a new user lands on this page, there's **no sign-up button** visible. This could be frustrating.

GOOD DESIGN

Soft, Warm Color Palette: The pink tones create a friendly and welcoming vibe, making the UI feel modern and approachable.

Minimalistic & Clean Layout: Simple, distraction-free design with only essential elements.

Readable Typography: The font is **bold and clear**, making it easy to read.

Alternative Sign-in Options: Google, Apple, and Facebook login options are included for convenience.

Wave-like Header Design: The **wavy background pattern** adds a **unique and stylish** touch.
