

EXP 7

🔧 Steps to Experiment and Collect Feedback:

1. Design Variations in Figma

- **Create multiple layouts:** Different arrangements of buttons, menus, home screen, etc.
- **Create multiple color schemes:** Try vibrant, pastel, minimalistic, or adventure-themed palettes.
- **Label each version clearly:** (e.g., Layout A / Layout B, Color Scheme 1 / Color Scheme 2)

👉 In Figma, you can use **Frames** to show each variation side-by-side.

Output:

2. Prepare Your Feedback Materials

- Export **images/screenshots** of each layout and color scheme.
 - Prepare a **presentation** inside the Google Form (or even a Notion page, if you want to be fancier) showing each option.
-

3. Set Up a Google Form for Feedback
